Education

Bengal College of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering

Durgapur, West Bengal

2022 – 2026

- Current CGPA: **8.5/10**

Kendriya Vidyalaya, NTPC Farakka

Higher Secondary (CBSE)

Murshidabad, West Bengal

2022

- Percentage: **74.6%**

Holy Family School

Secondary Education (ICSE)

Farakka, West Bengal

2020

- Percentage: **79%**

Experience

NTPC, Farakka

Software Development Intern

Farakka, West Bengal

Jun 2025 – Jul 2025

- Designed and developed a full-stack web application to digitize IT asset import and export tracking for organizational inventory management.
- Implemented secure role-based access control (RBAC) to manage user permissions and streamline asset management workflows.
- Developed automated asset tracking workflows that replaced manual record-keeping, improving inventory visibility and operational efficiency.
- Collaborated with mentors to analyze business requirements and deliver a scalable solution using modern web technologies.

Ardent Computech Pvt. Ltd.

Machine Learning Intern

Durgapur, West Bengal

Jul 2025 – Sep 2025

- Completed an intensive 8-week internship focused on Python, Machine Learning, Deep Learning, and Artificial Intelligence concept.
- Built an Air Quality Index (AQI) forecasting model using historical pollution datasets and supervised machine learning techniques.
- Performed data preprocessing, feature engineering, model training, and evaluation to improve prediction accuracy.
- Applied predictive analytics techniques to generate meaningful insights from environmental datasets.

Projects

Import Export Monitoring System | Node.js, React.js, SQL, REST APIs

- Developed a full-stack web application to digitize IT asset import/export tracking, replacing manual inventory management with a centralized system.
- Built using React.js, Node.js, SQL, and REST APIs with CRUD functionality and role-based access control (RBAC).

AQI Forecasting System | Python, Pandas, Scikit-learn

- Built a machine learning application to predict Air Quality Index (AQI) from historical pollution data and visualize environmental insights.
- Implemented using Python, Pandas, Scikit-learn, feature engineering, data preprocessing, and model evaluation techniques.

Weather Forecast Application | React.js, JavaScript, REST API

- Developed a responsive web application that displays real-time weather conditions and forecasts for user-specified locations.
- Built with React.js, JavaScript, and third-party REST APIs, incorporating asynchronous API calls and error handling.

Technical Skills

Programming Languages: Java, Python, C, C++

Web Technologies: React.js, Node.js, HTML, CSS, JavaScript, REST APIs

Machine Learning: Machine Learning, Data Preprocessing, Feature Engineering, Predictive Modeling

Databases: SQL, Relational Databases

Tools & Technologies: Git, GitHub, VS Code

Core Computer Science: Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Development Life Cycle (SDLC)

Design: UI/UX Design
